PROFESSIONAL SUMMARY

Product Designer with 5+ years of design experience and hands-on full-stack development experience. Specializes in UI/UX and product design for web applications and SaaS platforms with the ability to take products from research and early concepts through prototypes, high-fidelity mockups, and production implementation. Experienced collaborating with engineers and stakeholders to balance user needs, technical constraints, and product requirements. Strong technical foundation in Vue.js, React.js, Nuxt.js, Tailwind CSS, Laravel, Supabase, and RESTful APIs, with experience using AI-assisted development tools to prototype, build, debug, and iterate.

TECHNICAL SKILLS

Product & UX: Product Design, UI/UX, User Research, Information Architecture, User Flows, Wireframing, Prototyping, Usability Testing, Design Systems, Interaction Design, Developer Handoff, Responsive Design

Frontend: Vue.js, React.js, Nuxt.js, Tailwind CSS, Shadcn UI, HTML5, CSS3

Backend: Laravel, Supabase, MySQL, REST APIs

Design: Figma, Adobe Photoshop, Adobe Illustrator

AI-Assisted Workflow: GitHub Copilot, Gemini, Google AI Studio

Tools & Workflow: Git, Agile/Scrum, SourceTree, AWS S3, Brevo, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Software Engineer

Ayahtek - Remote | Oct 2025 - Present

- Developed and maintained full-stack web and PWA (Progressive Web Apps) applications for enterprise SaaS and e-government platforms using Vue.js, Nuxt.js, Tailwind CSS, Laravel, Supabase, MySQL, and RESTful APIs.
- Delivered 110+ tracked development tickets for the HR (Human Resources) management platform over 3 months, spanning feature development, frontend implementation, backend logic, API integrations, debugging, and maintenance.
- Built the complete customer-facing experience, delivering 15 pages and 8 functional modals for activity discovery, bookings, notifications, credits, gift cards, profiles, and account management within 2 business weeks.
- Developed reusable UI components and patterns using Shadcn UI and Tailwind CSS, while collaborating with engineers and stakeholders to clarify requirements, troubleshoot issues, and deliver features through deployment.
- Leveraged GitHub Copilot, Gemini, and Google AI Studio for coding assistance, rapid prototyping, debugging, and development exploration while reviewing and adapting generated output for production use.

UI/UX Designer & Front-End Developer Intern

Ayahtek - Remote | Jan 2025 – Jul 2025

- Designed 70+ UI screens and interactive prototypes across 8 projects/products, translating product requirements into responsive and user-centered interfaces using Figma.
- Applied Information Architecture, user flows, Wireframing, and Prototyping to structure and refine product experiences.
- Translated Figma designs into responsive interfaces using Vue.js and Tailwind CSS, bridging design decisions with frontend implementation.
- Collaborated with developers and project managers to improve design handoff and component specifications consistency across projects.

Graphic & UI/UX Designer

Freelance - Remote | Jan 2021 – Present

- Delivered 15+ freelance projects for local and international clients across brand identity, UI/UX, web design, digital marketing assets, and print.
- Gathered client requirements and feedback to define user needs, structure content, map user journeys, and develop visual and interaction solutions.
- Produced Figma wireframes, interactive prototypes, high-fidelity mockups, and final design assets while managing projects from concept through delivery and implementation support.

Creative Design Director

FEU Tech Alliance of Information Technology Students | Oct 2022 – Jul 2024

- Directed a creative team of 6 designers for 2 years, establishing visual standards and coordinating the production of 100+ design assets for university-wide campaigns and events.
- Produced and supervised posters, social media pubmats, presentation decks, event IDs, letterheads, profile/DP campaigns, and other digital and print materials.
- Established repeatable creative workflows and visual standards while mentoring junior designers and supporting leadership transition within the creative team.

PROJECTS

KonektaLaw (Award-Winning Legal Tech Platform)

Product Design · UI/UX · Branding · Web Development

- Conducted User Research, surveys, and feedback gathering to understand user needs and structure a legal-tech platform connecting clients with lawyers based on their legal concerns.
- Defined the product's Information Architecture and user journeys, then developed Wireframes, Prototypes, and high-fidelity mockups through iterative usability improvements.

- Contributed to frontend development using Bootstrap within a 4-person team, translating validated designs into a responsive web product.
- Deployed and handed over the platform to a local law firm for continued maintenance by its internal IT team; the project received 7 major awards, including Best Capstone Project, Most Innovative Project, Best Web Application, Best Mobile Application, Best Research Poster, Champion - IT Skills Olympics, and 2nd Runner Up - National TechnoFest

HR Management System

UI/UX · Web & PWA Development

- Designed complex SaaS workflows for employee management, payroll, payslips, reimbursements, trainee management, engagement feeds, and mood tracking.
- Structured the product's Information Architecture and translated requirements into user flows, wireframes, interactive prototypes, and high-fidelity mockups.
- Iterated on workflows through Usability Testing and feedback, focusing on clarity and ease of use across data-dense administrative interfaces.
- Contributed to responsive web/PWA and full-stack implementation, translating product designs into functional interfaces and reusable UI patterns.

Kid's Learning & Booking Platform

Full-Stack Development · Web & PWA

- Designed customer-facing learning and booking experiences, mapping discovery and scheduling journeys into clear navigation, responsive interfaces, and functional booking flows.
- Contributed to full-stack development, translating product concepts and UI designs into a working web/PWA experience.

LiftNow PH (Non-Profit Platform)

UI/UX · Web Design · WordPress

- Designed, developed, and deployed a responsive platform from Figma wireframes and high-fidelity mockups for a non-profit educational initiative.

Trading Education Prototype

UI/UX · Prototyping

- Designed an interactive trading education landing page concept using Information Architecture, visual hierarchy, micro-interactions, and high-fidelity prototyping.

EDUCATION & CERTIFICATIONS

- **BS Information Technology, Specialization in Web & Mobile** – FEU Institute of Technology | Graduated 2025
- **Google UX Design Professional Certificate** – Coursera | Feb 2026
- **PMI Project Management Ready™** – Project Management Institute | Dec 2024
- **IT Specialist: HTML & CSS** – Certiport | Nov 2024
